Summary

AI and Software Engineer with 2 years of experience at MAQ Software, on a four-developer team behind a live AI support agent (500+ daily active users). Works with Python RAG (FAISS, BM25), MCP tooling, and Azure AI Foundry; built FinPulse AI (FastAPI, LangGraph) and Eatensity (90+ users).

Experience

MAQ Software Hyderabad, India
Software Engineer I *Sept 2025 – Present*

- Part of a four-developer team running a live AI support agent on Azure AI Foundry and Azure OpenAI (`gpt-4.1`, `gpt-4o`) with 500+ daily active users; added OpenTelemetry tracing.
- Prototyped Python RAG and ticket classification over 27,000+ tickets (`sentence-transformers` on ONNX Runtime, FAISS and BM25 fused with RRF, 9 MCP tools), reaching 93.8% L1 category match on a 210-case regression set.
- Delivered backend changes for the agent: fail-closed role entitlement with caller-bound citations, HMAC-hashed interaction logging, and a flag-gated Agent Framework router with concurrent retrieval and fallbacks.
- Built GitHub Copilot PR-review automation and custom MCP agents for the wider developer team (30% less review effort), plus a FastMCP agent-management server and an LLM-as-judge evaluation harness.
- Contributed to a C#/.NET event-driven integration service on Azure (Durable Functions, Event Grid, Service Bus, APIM), mostly in Function Apps; the team cut provisioning from 2 hours to 5 minutes.

MAQ Software Hyderabad, India
Associate Software Engineer *Aug 2024 – Aug 2025*

- Helped build the proof of concept and initial working prototype of a client team's finance web app (expense capture, cost calculation, role-based approvals), fixed 15+ defects found in user acceptance testing, and handed it to another team for further development.
- Refactored legacy C# handlers and JavaScript front-end modules and consolidated redundant API calls for faster page loads.

Technical Skills

AI & Agents: LLMs (Azure OpenAI GPT-4.1/4o, Claude, Gemini), RAG, LangChain, LangGraph, MCP, Foundry
Embeddings & Search: Hugging Face (sentence-transformers, BGE, CLIP), ONNX Runtime, FAISS, BM25, RRF, pgvector
Python & Backend: Python, FastAPI, Pydantic, NumPy, Pandas, C#, .NET 8/10, ASP.NET Web API, Durable Functions, Event Grid
Web & Languages: TypeScript, JavaScript, Java, SQL, React, Next.js 15, React Native, Streamlit, Node.js, Hono, Spring Boot
Data, DevOps & Testing: PostgreSQL (tsvector, pg_trgm), Cosmos DB, SQL Server, Docker, Git, GitHub Actions, pytest, Vitest, JUnit

Projects

Eatensity | *TypeScript, Next.js 15, React Native, Hono, Gemini API, PostgreSQL* | Live · eatensity.com · GitHub

- Nutrition app (90+ active users) with a rule-based and Gemini 2.0 Flash natural-language meal parser (structured JSON outputs, prompt-injection guards) and intent-classified search (tsvector, pg_trgm) over 3,070+ foods, with 375 Vitest tests.

FinPulse AI Agent | *Python, FastAPI, LangChain, LangGraph, FAISS, Pandas, NumPy, Streamlit, Docker* | GitHub

- Containerized FastAPI and 4-node LangGraph agent service combining hybrid RAG (FAISS cosine search, BM25 Reciprocal Rank Fusion, prompt-injection guards) with Pandas/NumPy indicator and Black-Scholes Greeks tools, OAuth2/JWT auth, a Streamlit UI, and pytest suites.

Kanso | *Java 17, Spring Boot 3, Spring Data JPA, H2* | GitHub

- Personal finance tracker with a Spring Boot REST API (OpenAPI) for CSV import, rule-based categorization, and mean + 2-sigma spending-anomaly detection, with AES-256-GCM encrypted backups and JUnit integration tests.

Education

CVR College of Engineering, JNTUH Hyderabad, India
B.Tech, Computer Science & Engineering | GPA: 8.23 / 10 *2021 – 2025*

Certifications & Achievements

Cloud & AI Certifications: AI Agent Builder Associate (AB-620) Link
Azure AI Apps and Agents Developer Associate (AI-103) Link
Azure AI Cloud Developer Associate (AI-200, successor to AZ-204) Link
Qualified GATE CSE 2024
Solved 550+ DSA problems on LeetCode, CodeChef, and Codeforces
EF SET Certificate, C2 Proficient (CEFR) Link
